Highway toll collections rise 67% on year to over ₹38,000 cr in FY22

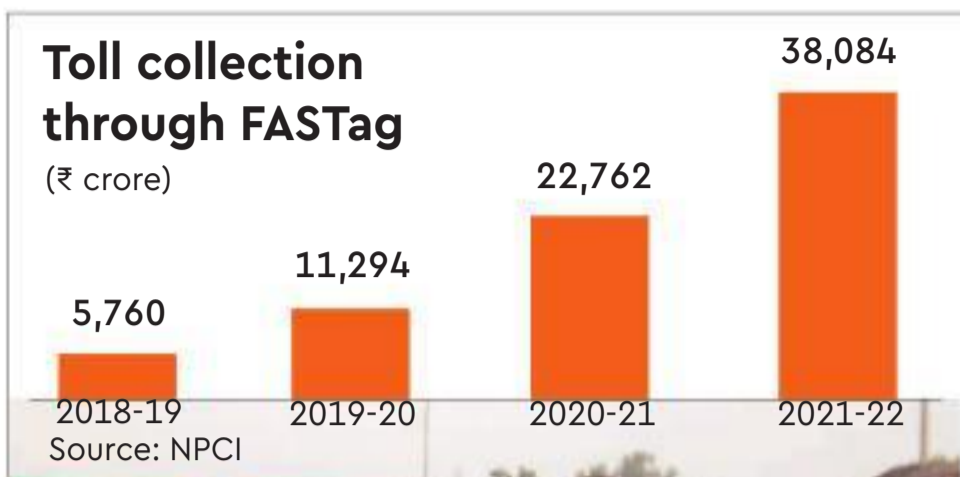

SURYA SARATHI RAY
New Delhi, April 7

TOLL COLLECTIONS THROUGH FASTags went up by nearly 67% on year to ₹38,084 crore in FY22, in keeping with the trend of robust growth in such receipts over the last few years.

At the end of March 2021, a total of 49.5 million FASTags were issued, the figure was 31.2 million in March 2020.

As per official data, as many as 270.41 million FASTag transactions were recorded in March, up 11% over February this year.

Collection of user fees on highways, both state and national highways, also went up nearly 13% to ₹4,095 crore in March over a month ago.

In March 2021, ₹3,086 crore was collected as toll from 193.21 million transactions. In March 2020, there were 84.55 million FASTag transactions and ₹1,421 crore was collected as toll through the electronic mode of collection

of user fees on highways. FASTags are used to collect toll on national highways and a few state highways where it has been implemented.

The Centre declared all lanes of fee plazas on national highways as FASTag lane with effect from midnight of February 16, 2021.

On national highways, FASTag penetration now stands at 96.5%.

Around 964 toll plazas are live on FASTag now across the country.

“The rise in FASTag transactions and collection of toll points towards heightened economic activity. The collections will witness a steep increase in coming months given the significant hike in toll rates in the range of 8.4-

13% with effect from April 1, 2022. Further, the increase in traffic is expected to be in the range of 5-6%,” said Icara’s Rajeshwar Burla.

The bump up in FASTag will be much more in year-on-year terms for April and May 2022 as there was an element of productivity loss in April and May 2021 due to the impact of the second wave on people movement which witnessed 10-25% drop in toll collections on a sequential basis, he said.

The rise in traffic on highways and resulting higher toll would yield well for the National Highways Authority of India (NHAI) to build newer stretches and retire debt that mounted to ₹3.5 trillion at the end of March 2022.

GST revenues in April seen at ₹1.5 trillion, a new peak

PRASANTA SAHU
New Delhi, April 7

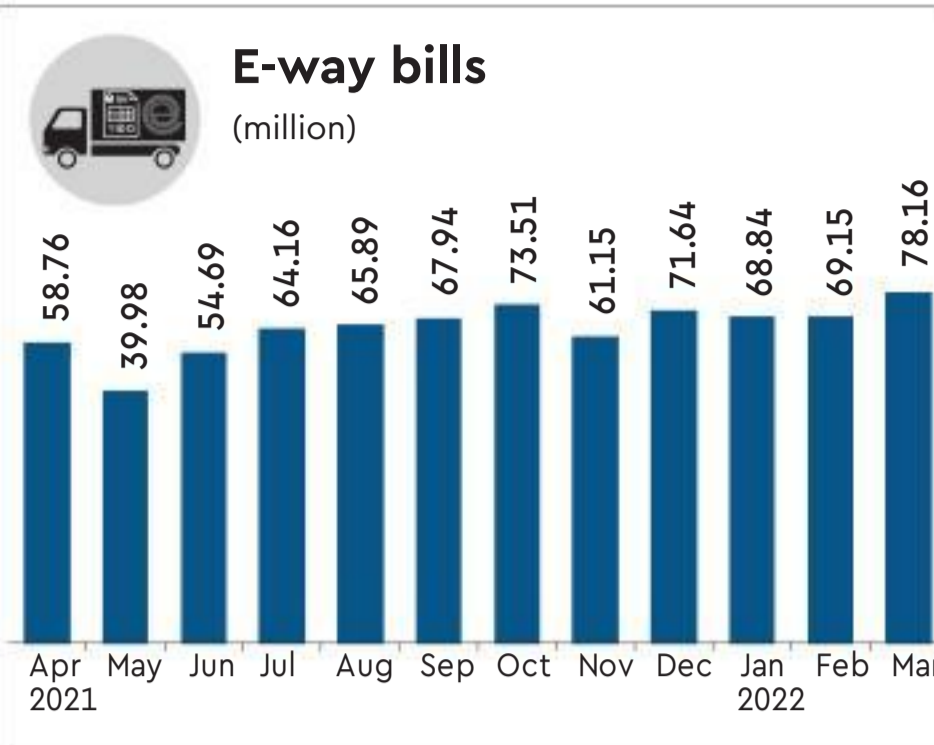

WITH THE E-WAY bills generated for inter-state trade in goods under the goods and services tax (GST) regime touching a record in March, the monthly GST collections will likely hit an all-time high of around ₹1.5 trillion in April (March transactions).

E-way bills came in at 78.16 million for March, the highest monthly data since the online system was rolled out on April 1, 2018, reflecting an uptick in demand and shipments before the year-end closure by companies for accounting purposes.

GST collections hit an all-time high of ₹1.42 trillion in March (February transactions), indicating robustness in consumption, efficient plugging of tax evasion and a sustained shift of business to the formal sector of the economy.

“April GST collections will set another all-time high new record,” a senior official told FE. E-way bills generation is a proxy for GST revenues.

In February, E-way bills generation rose 0.5% on month to 69.15 million whereas March GST collections (February transactions) rose 6.8% on month to ₹1.42 trillion.

With the E-way bills rising 13% on month in March, the GST collections will see a substantial jump despite a likely increase in GST refunds.

“Companies cleared out more stocks due to year-end push, which increased dispatches and utilization of loading capacity of each truck as well,” All India Transporters Welfare Association (AITWA) joint secretary Abhishek Gupta told FE.

Almost 99% of e-way bills are generated under the road category, Gupta said.

Continued buoyancy in GST collections for several months in a row would help allay the state governments’

concerns about a revenue shock they might have to deal with once five-year revenue protection ends on June 30.

For the Centre, the high mop-up would mean its share of the tax as Central GST would be higher than the revised estimate of ₹5.7 trillion for FY22 by ₹20,000 crore or thereabouts.

Given that an incipient pick-up in consumption has resulted in a more-than-proportionate jump in GST revenues, a stronger economic recovery could allow the collections to settle at an elevated level, proving the high revenue productivity of the broad-based consumption tax.

High energy prices to weigh on growth and inflation outlook: Finmin

FE BUREAU
New Delhi, April 7

THE CURRENT ELEVATED level of international crude price, should it persist for a long time, may come in the way of India achieving a real economic growth rate of 8%-plus in FY23 and pose upside risks to inflation as well, the finance ministry said on Thursday.

The latest Economic Survey, presented before the Ukraine crisis, had pegged real growth for FY23 at 8-8.5%. More recently, some analysts have trimmed their FY23 growth projections to 7-8.5%. Retail inflation, meanwhile, scaled an eight-month peak of 6.07% in February, having hit the upper band of the Reserve Bank of India’s (RBI’s) medium-term target of 2-6% for a second straight month. This is expected to have risen further in March due to the hike in domestic fuel prices.

The government is exploring all viable options, including import diversification, to procure crude oil at an affordable price, the department of economic affairs said in its report for March.

It, however, stressed that the economy, which recovered from a record, Covid-induced slide in FY21, will likely prove ‘resilient’ despite the ripple-effect of the Russia-Ukraine conflict, thanks to the government’s renewed thrust on capital expenditure and improved financial health of the corporate sector.

There are ‘nascent signs

that rising public capex may be crowding in private capex as well”, the report said. The Centre’s capital investment until February of FY22 has surpassed the levels in the corresponding periods of the pandemic and pre-Covid years, it added.

“The magnitude of the impact (of the Ukraine crisis) would depend on the persistence of high prices. Nevertheless, domestic economic momentum witnessed in government capital expenditure, rise in GST collections and import of capital goods offer comfort that the impact on the Indian economy may turn out to be tolerable,” the report said.

Global Brent crude oil prices have hovered around \$105-106 per barrel in April, having risen above \$135 in the first and second weeks of March from about \$95 just before the crisis in late February. The economy is also benefiting from continued robust growth momentum in the agriculture sector. Industry, too, has also been witnessing strong growth, particularly in the second-half of FY22, the report said.

The eight core infrastructure industries registered growth of 5.8% in February 2022 from a year before, the highest in the last four months. PMI manufacturing has stayed in the expansionary zone continuously for nine months (although it eased in March from the February level). PMI Services has also recorded expansion for eight months now. GST collections, too, breached ₹1.4 trillion in March.

Automated fitness tests mandatory for heavy vehicles from April 2023

FE BUREAU
New Delhi, April 7

COME APRIL NEXT year, all heavy vehicles — goods and passenger — will have to mandatorily get the fitness test done in automated service stations (ATS). Medium goods and passenger vehicles as well as light motor vehicles (transport) will have to follow the same process from June 1, 2024.

In a gazette notification, issued on April 5, the ministry of road transport and highways said that fitness certificate of the vehicles will have to be renewed every two years for vehicles up to eight

years old. For vehicles of above eight years, the fitness certificate has to be renewed every year.

At present, fitness tests on vehicles done manually are also acceptable. The changes have been brought in through an amendment on Central Motor Vehicles Rules, 1989. The Central Motor Vehicles (Eighth Amendment) Rules, 2022, under which the new rules have been brought in, will take immediate effect.

The changes are part of the vehicle scrapping policy the government has already formulated, aimed at creating an ecosystem to phase out unfit and polluting vehicles in

the country. A notification that provides for recognition, regulation and control of ATS has come into force with effect from September 25, 2021.

An ATS is like a doctor who will prescribe whether a vehicle is fit for the road or not after testing. Under the vehicle scrapping policy, if fitness and its registration certificates are renewed, a private vehicle can ply on the roads even after 20 years of first registration and a commercial vehicle beyond 15 years. However, increased fitness fees and re-registration charges would act as a deterrent for an owner to retain old vehicle.

Tamil Nadu signs ₹1000-cr MoU with Taiwan’s Hong Fu footwear group

FE BUREAU
Chennai, April 7

THE TAMIL NADU government on Thursday signed a memorandum of understanding (MoU) with Taiwan-based Hong Fu footwear group to expand its business in the state.

Under the MoU, signed in the presence of Tamil Nadu chief minister M K Stalin, Hong Fu is expected to invest ₹1,000 crore in the next three to five years and generate 20,000 job opportunities for which the company will focus

on more women recruitment. Also, this MoU will contribute to the footwear industry of Tamil Nadu majorly and the state’s exports to several overseas countries, said a release by the state government.

Hong Fu Footwear group designs, manufactures and sells sports footwear since 2003 onwards. It produces footwear for well-known global brands like Nike, Puma, Converse, and Vans, among others.

RBI proposes to simplify payment settlement process for trade via e-com

PRESS TRUST OF INDIA
Mumbai, April 7

RESERVE BANK OF India on Thursday proposed to modify the existing norms to simplify and rationalise the process for settlement of payment for exports and imports through e-commerce.

RBI has issued draft guidelines on ‘Processing and Settlement of small value Export and Import related payments’ facilitated by Online Export-Import Facilitators (OEIF) (erstwhile OPGSP).

“With development in the ecosystem for e-commerce and the feedback received from banks and other stakeholders, on a comprehensive review, the extant guidelines

are being modified to further simplify and rationalise the process for settlement of payment for export and import through e-commerce,” it said.

On import transactions, the central bank has proposed that the facility shall be available for online import of goods and digital products of value not exceeding \$3,000.

In case of exports, the limit has been proposed at \$15,000.

Currently, banks are permitted to offer the facility of processing and settlement of import and export-related remittances by entering into standing contract with Online Payment Gateway Service Providers (OPGSPs) in respect of export of goods and services as well as import of goods and software.

Gujarat all set for record summer sowing

FE BUREAU
Ahmedabad, April 7

DUE TO INCREASING prices of agriculture commodities as well as availability of water, Gujarat is all set for record summer sowing across the crops.

As per the data of state agriculture department, progressive sowing area of 2022 season has not only crossed previous year’s 8,14,533 hectares but it has already crossed past three year’s average sowing area. Against the last three year’s average sowing of 8,98,401 hectares, acreage across the crops reached over 10.10 lakh hectares.

“Due to MSP as well as higher market prices of different agricultural commodities coupled with availability of ground water, the state is witnessing increased acreage in summer sowing. Parts of Gujarat witnessed prolonged monsoon last year. As a result, in some areas farmers are taking crops in all three seasons including that of summer,” said CM Patel, joint director of agriculture.

Farmers in Gujarat resorted to pulses this summer season as they earned handsomely from these cash crops during the previous two years, says Sagar Rabari, trustee of Khedut Ekta Manch. Rabari also believes that another reason for the increased acreage in the summer season is availability of groundwater.

According to him, some of Gujarat farmers are also experimenting on soyabean as one of the summer crops.

Acreage of pulses has augmented by 166% compared to last three year’s average sowing from 53,764 hectares to as high as 90,000 hectares. During the last summer season, pulses were sown in 63,000 hectares across Gujarat. Sowing of oilseeds too increased by 148% from 1,07,500 hectares to 1,60 lakh hectares. This rise is due to widespread sowing of sesamum (til) which increased from 58,000 hectares to over 1 lakh hectares indicating 72% rise in sowing areas compared to past three year’s average. Acreage of another oilseed crop groundnut too has gone up from 49,200 hectare to as high as 60,000 hectares, especially in Saurashtra and North

Gujarat regions. Interestingly, there has been a slight rise in sowing of cereal from the past three years average of 3.15 lakh hectare to 3.21 lakh hectares in the current summer season. However, compared to previous summer season’s 2.75 lakh hectares, there has been significant increase in acreage of cereal crops, as per the latest data of the state agriculture department.

For some of the other crops including onion, vegetables, fodder and Guar gum, the sowing areas increased this summer season compared to past three years average as well as last year’s sowing areas. Sowing of sugarcane, which requires lots of water, has increased by 130% in the state from 6,767 hectares to 8,823 hectares.
